

THE JOB: SOFTWARE TESTER

AWH is seeking a Software Tester. If you have a passion for understanding and testing all aspects of software products, this is the gig for you.

DO YOU HAVE THIS?

- Two to three years of experience as a software tester.
- The ability to create test strategies for software products outlining what testing techniques will be required and how they will be implemented.
- Experience with data-driven applications and strategies for testing at the UI, API, and data layer.
- Some experience with BDD and test automation would be helpful.
- The ability to work multiple projects simultaneously and to prioritize and balance multiple tasks.
- You enjoy working with a team, yet you're self-motivated to get things done on time (without a boss breathing down your neck).
- You love navigating software and you want to make it better.

ABOUT US

AWH is a 23-year old software engineering and product development firm. We offer health, dental, vision, retirement, and a liberal vacation policy. You must be willing to pass a criminal, financial, and drug screen background check. Salary commensurate with experience.

Let's talk: Please forward your resume -- we're looking forward to getting to know you!
